

Hello!

BIZ VIZ – Your visualization lookbook!

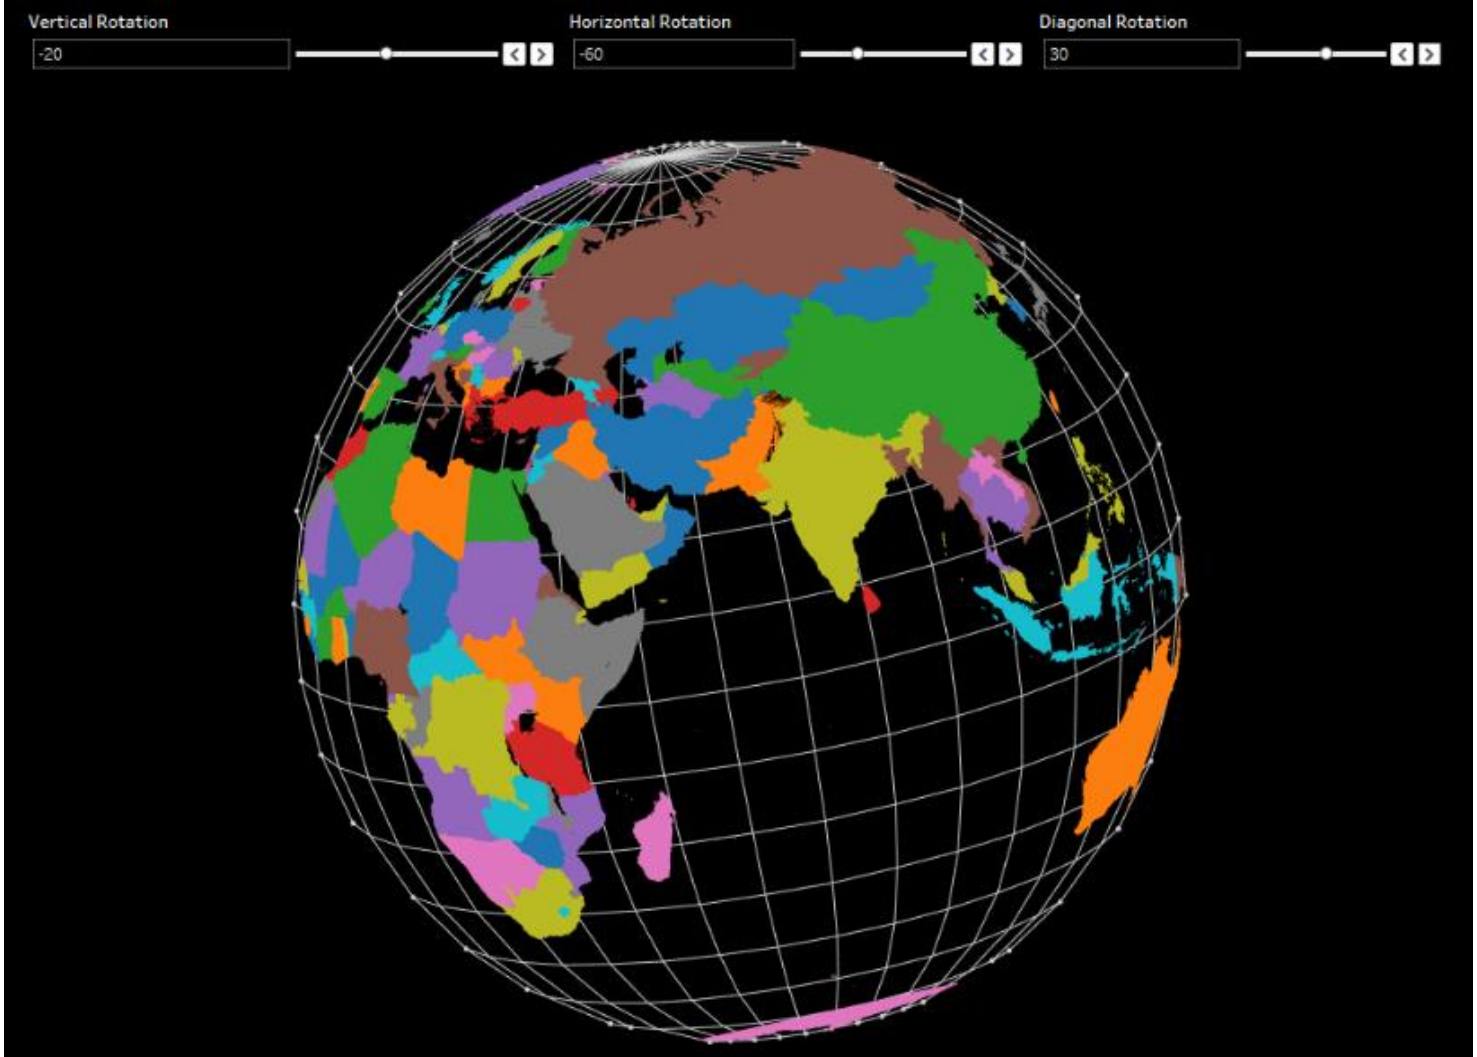

December 2017 – 2nd Issue

The visualization will help us to see the region globally in a 360 degree view. Here, we have created three parameter to view the globe horizontally, vertically and diagonally.

Globe Analysis (360 Degree View)

MAP BOX

In the visualization, Map is been plotted using Mapbox.

Mapbox is an open source mapping platform for custom designed maps. Their APIs and SDKs are the building blocks to integrate location into any mobile or web app. Mapbox is built on vector maps, an advanced approach to mapping where data is delivered to the device and precisely rendered in real-time. The result is smooth, fast maps.
