

Change the font size of the calculation box

When working with long or complex formulas or when demonstrating to a large audience, you might need to increase the font size so that everyone in the audience can see the text, especially those in the last rows. By default the text size is small as shown in Fig 1.

Fig (1)

For PC users, make the text in the calculation box larger (or smaller) by holding the CTRL key+ using the scroll wheel on your mouse. CTRL + Scroll UP to increase font size as shown in Fig 2 / CTRL + Scroll down to decrease it as shown in Fig 1.
