

Changing the default display for Grand Total Column

Normally when you build a visualizations in tableau and select Show Row Grand Totals option, by default totals are shown as in figure 1. Generally users want to see totals next to the relevant fields as shown in figure 2.

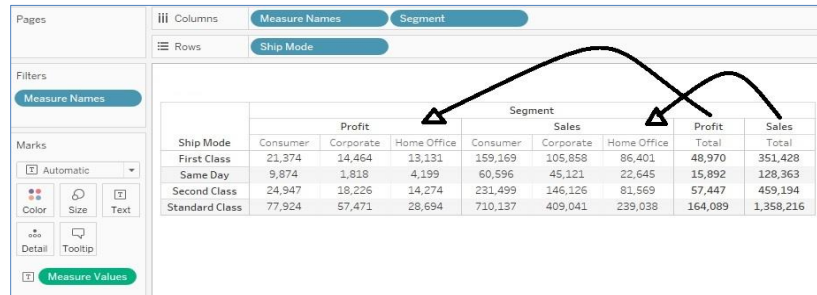

Fig (1)

Fig (2)

Steps to be followed to achieve this:

1. Create an empty string field in the column shelf and drag it to the front of measure names field.
2. Now go to Menu option **Analysis > Totals > Add all Subtotals** and select the option.

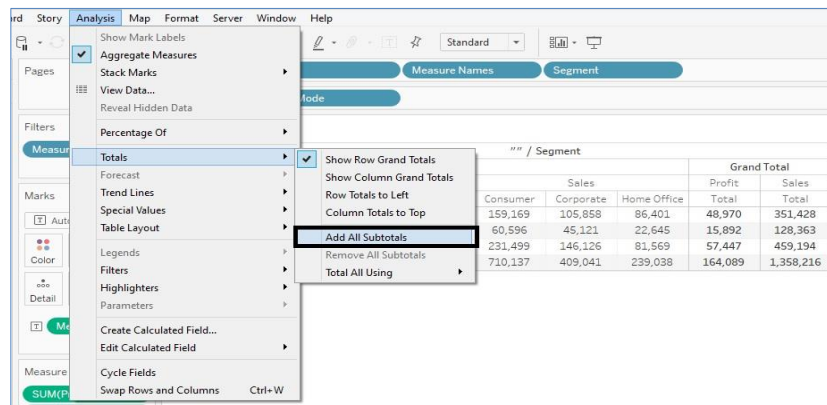

Fig (3)

3. Uncheck Show Row Grand Totals option in **Analysis > Totals > Show Row Grand Totals**.
