

Hello!

**BIZ VIZ – Your visualization lookbook!**

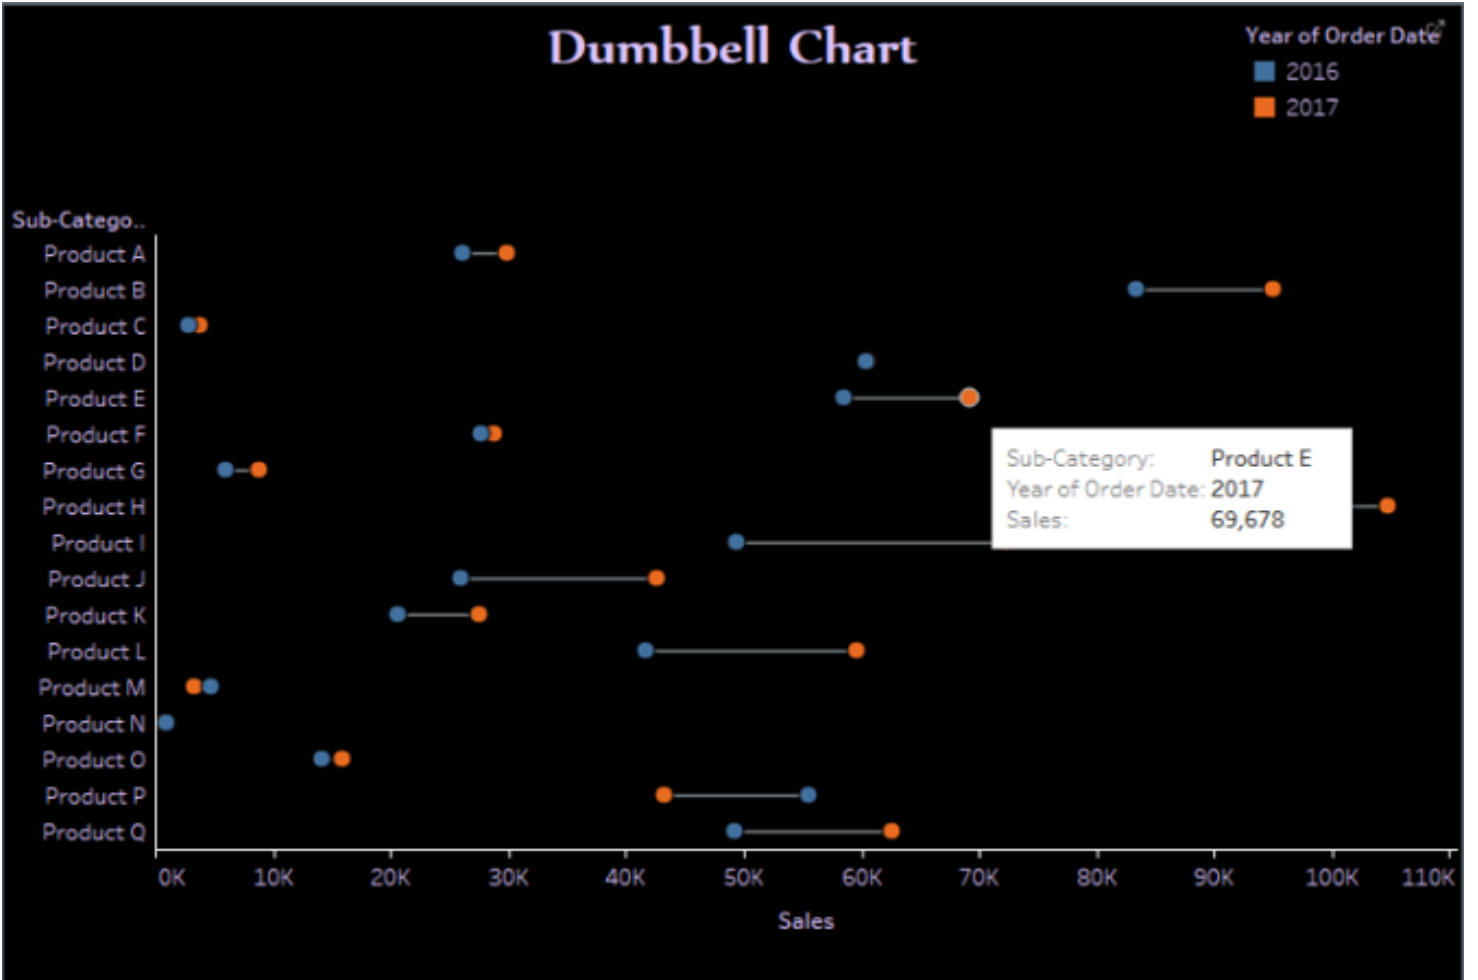

July 2017 – 1st Issue

This Visualization helps in comparing the change between two data point.

Here, the visualization compares the change in amount of sales from year 2016 to 2017 across sub-categories, where years is been depicted through the colors and the change in sales is been depicted through the line.

Hovering upon the dots will provide with the detail description of the analysis.

**DUMBBELL CHART**

Dumbbell Chart is also known as DNA Chart in Tableau. It is effectively used to illustrate the change of data between two points. It is a dual axis chart with one marks type to be circle and the other marks types to be in a line.
