

BANKING ANALYSIS

This Visualization helps in identifying the number of transaction been processed in a bank over a period of time along with the type and mode for payment.

Here, we have created a parameter for ‘Select last N days’ which help the user to track the latest transactions.

Further selecting the payment type, will take the user to the drill down level to track the number of transaction and the mode for payment.

DONUT CHART

Donut is also known as Doughnut chart in tableau, it is just a simple pie chart with a circle in the middle. It is a circular statistical graphic which is divided into slices to illustrate numerical proportion.
