Calendar Chart

Calendar charts display data activity over the course of several months up to a full calendar year.

Here, selecting a particular year and month will display date wise detail of event along with the amount allocated for each event.

CALENDAR CHART

Calendar charts also known as Heat Map in Tableau, display data activity over the course of several months up to a full calendar year. They are useful for comparing data over time and to highlight specific dates (holidays, events, and meetings).

How to create Calendar Chart in Tableau
